

# My Rau

Be the first to write a review for this company. One of the easiest ways to cook with hemp or marijuana is to start by making cannabutter. THC, CBD and other cannabinoids and terpenes are soluble in oils like butterfat. Ghee (clarified butter) is an excellent solvent because it has a longer shelf life compared to butter.

Mxrider14, Weedmaps (Pueblo East) Make a shallow dent in the side to form a small bowl and then use a pin to make a few holes in this area. Load your buds in the dent and then use the empty tab opening to take a draw. The advantage of this method over the pen is that you are less likely to get hot smoke burning your lips and can get a stronger draw.
